ACCENT ON SPRING

1945

Never for an instant forgetting that a war—a terrifically big war—is still to be won, the American mind, future-cast, toys with a vivid theme of reconversion. We have fought and are fighting to uphold and defend precious privileges that are paid for in suffering, tears, and sacrifice. A stiff price—but the stuff of which peace and freedom are molded.

Yet another reconversion goes on, year after year, regardless of war or peace. It is the reconversion to Spring and growing things after the sterile cycle of Winter has completed itself. The miraculous rebirth holds subtle, silent promise of a newly awakened world—an innate sense of peace and well-being that comes of beholding the breath-snatching beauty of a hawthorn in bloom, its white petals a benison soon to be laid on the ground . . . the brilliant effectiveness of red maple . . . of tall, statuesque elms . . . the aristocratic perfection of taxus and spruce.

Such beauty is so easily yours for the taking. This close association with the soil is stimulating, invigorating; its rewards profuse. Home life is now stressed as never before, and your garden is essentially an important part of this life.

Home and the serenity of its surroundings are, to the fighting men, memory flames that burn brightly through the dark hours of conflict. Therefore, you here will resolve to preserve and cultivate the beauty of that home and garden—so they will realize their dreams.

Let us assist you with your gardening problems. Let us help you put the . . . ACCENT ON SPRING.

WAUKEGAN NURSERIES

(Incorporated)

GREEN BAY ROAD

WAUKEGAN, ILL.

Phone Majestic 30

Taxus Cuspidata
(spreading yew)

A counterpart of the upright variety, it should be trimmed consistently to produce a well-formed and full plant, and will also give you a grand hedge.

18/24 in. wide.....each \$ 6.00	3½/4 ft. wide.....each \$18.00
24/30 in. wide.....each 8.50	4/4½ ft. wide.....each 25.00
2½/3 ft. wide.....each 11.50	4½/5 ft. wide.....each 30.00
3/3½ ft. wide.....each 15.00	5/5½ ft. wide.....each 35.00
5½/6 ft. wide.....each \$40.00	

Taxus Capitata (upright yew)

Most desirable for entrance or distinct accent use, it adapts itself to shearing and seems to do better when trimmed often through the season.

Will give you much pleasure because of its beauty and dark green color which blends with all other types of evergreens.

2 ft. high.....each \$ 6.00
2½ ft. high.....each 8.00
3 ft. high.....each 10.00
3½ ft. high.....each 12.00
4 ft. high.....each 15.00
4½ ft. high.....each 18.00
5 ft. high.....each 22.00
5½ ft. high.....each 25.00

Taxus Cuspidata Nana

Taxus cuspidata nana (Dwarf yew)

A truly distinguished little evergreen and the finest dwarf it is possible to obtain for your garden. Lower in growth and with less of a spread than any of the prostrate yews the irregular little branches are thickly covered with short black-green needles. Indispensable for foundation planting it can also be used with superb effects in the perennial borders.

12/15 in. wide.....each	4.00	18/24 in. wide.....each	8.00
15/18 in. wide.....each	6.00	24/30 in. wide.....each	10.00

Taxus cuspidata Intermedia

This yew is similar to the dwarf variety but grows much faster and is very desirable in creating a heavy tufted plant or hedge. It will always give great satisfaction.

15/18 inches spread.....each	\$ 5.50
18/24 inches spread.....each	7.50
24/30 inches spread.....each	10.00
30/36 inches spread.....each	13.50

Taxus media hicksi (Hick's yew)

Of real value for formal effects for narrow hedges, or in the rear of foundation planting, Hick's yew is columnar in form, slender and sturdy. The red fruits are particularly conspicuous on this variety.

1½ ft. high.....each	\$ 4.00	2½ ft. high.....each	\$ 8.00
2 ft. high.....each	6.00	3 ft. high.....each	10.00

Pinus mugho (Swiss mountain pine)

Of round shape with irregular branches this is a low-growing evergreen of exceptional character. Unusually hardy.

15/18 in. wide.....each 3.50

Pinus nigra (Austrian pine)

Long, stiff, dark green needles and wide-spreading branches. Three-inch cones. Decorative. Withstands smoke.

6/7 ft. high.....each 12.00 7/8 ft. high.....each 15.00
8/9 ft. high.....each 18.00

Pinus resinosa (Red Pine)

The longest leaf of any hardy pine; very dark. Indeed makes a beautiful plant when properly taken care of.

2/3 ft. high.....each 3.00 3/4 ft. high.....each 4.50

Pinus ponderosa (Bull Pine)

A fine ornamental tree and valuable for windbreak or timber. Needles very long and somewhat lighter in color than the Austrian or Red Pine.

5/6 ft. high.....each 9.00 7/8 ft. high.....each 15.00
6/7 ft. high.....each 12.00 8/9 ft. high.....each 18.00

Pinus strobus (White pine)

Long considered king of American conifers. Develops into a venerable specimen. Dignity combined with regal assurance.

2½/3 ft. high.....each 3.50 3/4 ft. high.....each 4.50
10/12 ft. high.....each 20.00 to 25.00
12/15 ft. high.....each 25.00 to 30.00

Pinus sylvestris (Scotch pine)

Fast growing for a pine. Good in a windbreak.

3/4 ft. high.....each 4.00
4/5 ft. high.....each 6.00
5/6 ft. high.....each 8.00

Our Nursery is located approximately 3 miles west of the city of Waukegan on Green Bay Road and is very easy to reach by auto. However, should you travel by train and will advise us one day in advance of your anticipated arrival, or phone us when you do arrive, we will arrange to meet you at the depot.

SPRUCE (*Picea*)

Majestic evergreens with short, flat needles. Good as specimens and highly desirable for inter-planting with firs which they somewhat resemble, or for combining with pines.

Picea pungens glauca (Colorado blue spruce)

Famous for its steel-blue needles, the Colorado blue spruce is desirable as a specimen where sharp color contrast is wanted.

2/3 ft. high.....	each \$ 5.00
3/4 ft. high.....	e ch 7.00
4/5 ft. high.....	each 9.50
5/6 ft. high.....	each 12.00

Picea pungens kostermaniana (Koster's blue spruce)

The handsomest and bluest of the spruces, this is one of the world's most renowned evergreens. The growth is symmetrical and the needles a uniform silvery-blue. Discovered in the Rockies, the Koster blue spruce came to American gardens by way of Switzerland and Holland where it was first propagated.

2/3 ft. high.....	each \$ 7.50	10/11 ft. high....	45.00 to 50.00
3/4 ft. high.....	each 10.00	11/12 ft. high....	50.00 to 75.00

Picea pungens (Colorado green spruce)

A fine variety with bluish-green needles. Branches in tiers.

2/3 ft. high.....	each 3.00	4/5 ft. high.....	each 6.00
3/4 ft. high.....	each 4.50	5/6 ft. high.....	each 7.50
6/7 ft. high.....	each 9.00		

Picea abies (Norway spruce)

Perhaps the most widely planted of the tall-growing evergreens. Pyramidal in shape. Dark green needles. Excellent for mass planting.

2/3 ft. high.....	each 1.50	3/4 ft. high.....	e ch \$2.00
-------------------	-----------	-------------------	-------------

Nursery stock personally selected will be tagged and priced at time selection is made.

WHITE FIR (*Abies concolor*)

A tall, worthwhile evergreen with graceful branches. Demands a well-drained location and moisture.

2/3 ft. high.....each \$4.00	4/5 ft. high.....each \$ 9.00
3/4 ft. high.....each 6.00	5/6 ft. high.....each 12.00
10/12 ft. high.....each 30.00 to 40.00	

DOUGLAS FIR (*Pseudotsuga douglasi*)

A handsome and hardy conical-shaped evergreen effective either as a specimen or in groups. Needles bluish-green. Reaches a height of two hundred feet in its native state. Tolerates considerable shade. Illustrated above.

2/3 ft. high.....each \$3.00	4/5 ft. high.....each \$6.00
3/4 ft. high.....each 4.50	5/6 ft. high.....each 8.00

Prices quoted are f.o.b. Nursery

Juniperus sabina von ehron (Von Ehron juniper)

Dark green needles on upright, wide-spreading branches. Rarely over five feet high, the Von Ehron juniper is a handsome, picturesque dwarf.

18/24 in. spread.....each \$3.50

Juniperus scopulorum (Colorado red cedar)

A pyramid up to forty feet high with silvery-green needles.

1 1/2 ft. high.....each 2.00 2 1/2 ft. high.....each 3.00

2 1/2 ft. high.....each 4.00

Juniperus squamata meyeri (Meyer juniper)

A beautiful deep blue evergreen. Dwarf and irregular in habit of growth. Excellent in a hedge.

12/15 in. high.....each 2.50 15/18 in. high.....each 3.00

Juniperus communis depressa plumosa (Andorra juniper)

A wide-spreading variety of low growth that turns a purplish-bronze in winter.

15 to 18 in. spread.....each \$2.00

18 to 24 in. spread.....each 2.50

Juniper virgiana Cannarti

This is the better of the cedar variety. It maintains a fine green color and with proper shearing will create a full and beautiful plant adaptable to all situations. Can be held in size for many years.

3 ft. tall.....each \$ 4.00

3 1/2 ft. tall.....each 5.00

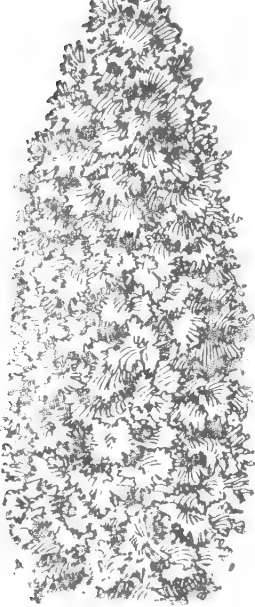

4 ft. tall.....each 6.50

4 1/2 ft. tall.....each 7.50

5 ft. tall.....each 8.50

5 1/2 ft. tall.....each 9.50

6 ft. tall.....each 11.00

**American
Arborvitae**

JUNIPER (Juniperus)

The junipers comprise a large and important group of evergreens. They vary in size and form, from the columnar to the prostrate.

Juniperus chinensis pfitzeriana (Pfitzer juniper)

An unusually hardy and reliable type with spreading, horizontal branches. Forms a low pyramid. Withstands smoke conditions. Useful in foundation or group planting.

18/24 inch spread	each \$3.50
2/2½ ft. spread.....	each 5.00
2½/3 ft. spread.....	each 6.00

Juniper sabina horizontalis (Bar Harbor)

A prostrate variety found on the coast of Maine. Hardy.

2/2½ ft. spread.....	each \$3.00
----------------------	-------------

Thuja occidentalis douglasi aurea (Douglas golden arborvitae)

A vigorous broad pyramidal growing evergreen introduced by us.

18/24 in. high.....	each 2.50	2/3 ft. high.....	each 3.50
6/7 ft. high.....	each 10.00		

Thuja occidentalis (American arborvitae)

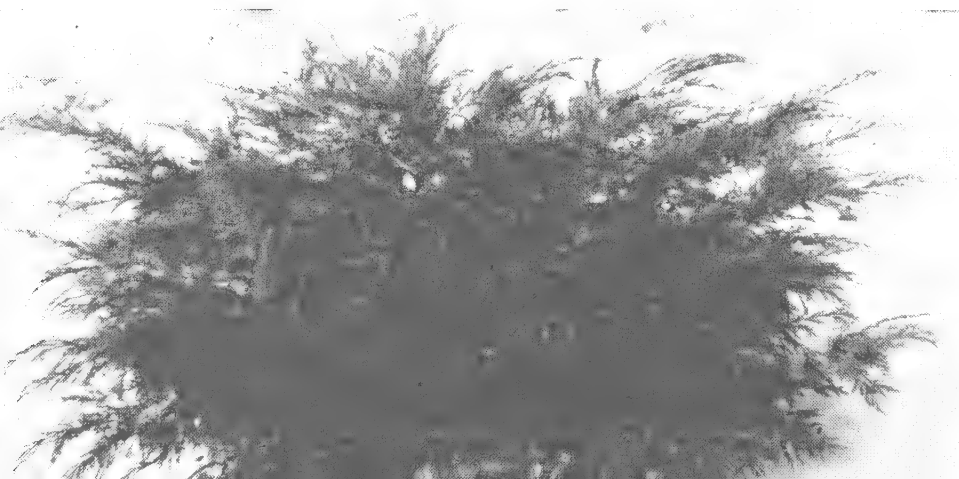

Develops into a handsome, spire-like specimen forty feet high. A good evergreen for hedges.

18/24 inches high.....	each 2.00
2/3 ft. high.....	each 3.00
3/4 ft. high.....	each 4.00
9/10 ft. high.....	each 15.00
10/12 ft. high.....	each 17.50

Thuja occidentalis pyramidalis (Pyramidal arborvitae)

The pyramidal form of the hardy American type that holds its color well in winter. A fine accent plant. Fifteen feet.

18/24 in. high.....	each 2.00	3/3½ ft. high.....	each 4.00
2/3 ft. high.....	each 3.00	3½/4 ft. high.....	each 5.00

Pfitzer Juniper

**Clumped
White Birch**

***Betula pendula* (European white birch)**

A tree of medium growth, white bark and pendulous branches.

1/1½ in. stem.....each	2.50	1½/2 in. stem.....each	3.50
2/2½ in. stem.....each	4.00		

***Betula pendula gracilis* (Cutleaf weeping birch)**

White bark, finely cut foliage and drooping branches make this unsurpassed as a lawn specimen.

1/1½ in. stem.....each	3.50	2/2½ in. stem.....each	6.50
1½/2 in. stem.....each	5.00	2½/3 in. stem.....each	8.50

Hackberry (*celtis occidentalis*)

A valuable tough-wooded shade tree with a straight trunk and broad, round headed. Foliage similar to the E'm. Fast growing.

1½/2 in. stem.....each	5.00	2/2½ in. stem.....each	7.00
------------------------	------	------------------------	------

Paul's Scarlet Thorn (*oxyacantha pauli*)

A mass of rose-like red flowers cover this tree in spring—beautiful to behold.

Can be used as a specimen tree or lends itself to mass planting.

6/7 ft. high B/B....ea.	10.00	7/8 ft. high B/B....ea.	12.50
-------------------------	-------	-------------------------	-------

WASHINGTON THORN (*crataegus cordata*)

This tree grows to good height. has bright red berry clusters: foliage turns to beautiful autumn tints.

5/6 ft. high B/B ea.....	5.50	6/7 ft. high B/B....ea.	7.50
--------------------------	------	-------------------------	------

***Sorbus aucuparia* (European mountain-ash)**

The rowan tree of druidic legend. Taller growing than the American variety. Blood-red berries.

1/1½ inch stem.....each	\$2.50
1½/2 inch stem.....each	3.50
2/2½ inch stem.....each	4.50

THE EVERGREEN

WHITE winds of winter,
Gold suns of spring,
Invade your green sanctum
On pulsating wing.

Soothed by drowsy summer
Lanced by autumn rain;
Lifting branches skyward
Stonily immune to pain.

Down time-tattered years
From verdant birth,
You hold a glorious
Alliance with earth.

—Kathryn Krier.

MAPLE (Acer)

Maples rank among our best known and most desirable shade trees. In fall their foliage adds brilliant reds and yellows to garden.

Acer platanoides (Norway maple)

A valuable lawn or shade tree attaining a height of ninety feet and more.

1 1/2 in. stem, 8/10 ft. tall.....	each	3.00
1 1/2 in. stem, 8/10 ft. tall.....	each	4.00
3 1/2 in. stem, 12/15 ft. tall, balled and burlapped.....		20.00
4 1/2 in. stem, 12/15 ft. tall, balled and burlapped.....		30.00

Larger trees priced at nursery.

Pyramid Norway Maple

This is a very desirable tree to plant in a limited space as it grows rather narrow and upright but very dense. Makes a good screen or accent tree.

1 1/2 inch stem, 8/10 ft. tall.....	each	\$3.50
1 1/2 inch stem, 10 ft. tall.....	each	4.50

Schwedler Maple (Acer Schwedleri)

A type of Norway, foliage of a purplish-red color appears in early spring changing to dark green in summer.

It is the Red Maple you frequently see in your travels about the country. Slow growing.

1 1/2 in. stem, 8/10 ft. tall.....	each	4.00
1 1/2 in. stem, 8/10 ft. tall.....	each	5.00

Larger trees priced at nursery.

Globe Maple

Soft or Silver Maple (Acer dasycarpum)

Develops to an immense tree. Fast growing and the best of the soft wood trees. Leaves are beautifully tinted in fall.

1 1/2 in. stem.....	each	2.50
1 1/2 in. stem.....	each	3.50

We also grow the cut leaf Maple and offer same at comparative low prices.

Acer platanoides globosa (Globe Norway maple)

This is a budded tree grown to form a globe-shaped head on 6-7 ft. standards; needs no pruning.

5 yr. head.....	each	\$6.00
6 yr. head.....	each	8.00

Ulmus americana (American elm)

Because of its tall, shapely growth and its magnificent vase-shaped head, there really is no tree to take the place of the American elm.

Lake City Elm (ulmus)

This tree grows upright, is closely branched and has large leaves. A very desirable tree for parkway planting or when space is limited. Spread of branches is unlike the regular American Elm, although it is of the same family.

All of the above elms are priced as follows:

2/2½ in. stem, 10/12 ft. tall.....	each	5.00
2½/3 in. stem, 10/12 ft. tall.....	each	6.50
3/3½ in. stem, 12/14 ft. tall.....	each	8.50
3½/4 in. stem, 12/15 ft. tall, balled and burlapped....		20.00
4/4½ in. stem, 15/17 ft. tall, balled and burlapped....		30.00

Larger sizes priced at nursery.

Chinese Elm (ulmus pumila)

We have a fine lot of these rapid-growing elms of good caliper and height; well-formed crowns. Foliage is smaller than the American Elm.

1½/2 in. stem.....	each	3.00
2½/3 in. stem.....	each	5.00

2/2½ in. stem.....	each	4.00
Larger sizes priced at nursery.		

American Linden (tilia americana)

A rapid-growing tree with round, glossy leaves and fragrant yellow flowers in June.

1½/2 inch stem,	
8/10 ft. high.....	each 4.00

2/2½ inch stem,	
8/10 ft. high.....	each 5.00

Larger sizes priced at nursery.

SYCAMORE

(Platanus occidentalis)

A very desirable tree, quite picturesque: sheds bark similar to white birch.

6/8 ft. high,	
1 inch stem.....	each 3.00

8/10 ft. high,	
1½ inch stem.....	each 4.00

Prices quoted are f.o.b. Nursery.

LINDEN (Tilia)

Ginkgo biloba (salisburia)

The maidenhair-tree is very picturesque and interesting, with foliage shaped like maidenhair fern. Immune from insects; smoke resistant.

5/6 ft. high.....	each	\$2.50
2/2½ in. stem, 8/10 ft. high.....	each	7.00
2½/3 in. stem, 8/10 ft. high.....	each	9.00

Horse-Chestnut (aesculus hippocastanum)

A beautiful symmetrical tree covered with showy pinnacles of white flowers and dark green leaves.

2/2½ inch stem, 6 to 8 ft. tall.....	each	\$6.00
2½/3 inch stem, 6 to 8 ft. tall.....	each	8.00

Populus alba pyramidalis (Bolleana poplar)

Of narrow, columnar growth and a good accent plant.

10/12 ft. high.....	each	\$2.50
12/14 ft. high.....	each	4.00

Populus nigra italica (Lombardy poplar)

Fast growing but short-lived. Splendid for quick windbreaks and screens.

6/8 ft. high.....	each	\$.75
8/10 ft. high.....	each	1.00
10/12 ft. high.....	each	1.25

Prunus Thundercloud (purple-leafed)

A fine strain of dark purple foliage which color it retains throughout the season. Very desirable as a specimen or accent plant.

5/6 ft. high.....	each	\$1.50
-------------------	------	--------

Golden Weeping Willow

One of our most popular trees for pool and bank planting, with its drooping branches it is the essence of grace. Fast growing.

4/6 ft. high.....	each	1.50	6/8 ft. high.....	each	2.50
1/1½ inch stem.....	each	3.50			

Bechtel's Crab

FLOWERING CRAB APPLES (*Malus*)

We have a fine lot of these tree-like plants of various pinks and white which lend themselves to mass planting or specimen trees.

A special price on our present lot for quick sale.

***Malus atrosanguinea* (Carmine crabapple)**

Carmine blossoms; red fruit.

***Malus baccata* (Siberian crab)**

Fragrant white bloom; red and yellow fruit.

***Malus coronaria* (Wild sweet crab)**

Fragrant rose blooms, fading white.

***Malus floribunda* (Showy crab)**

Pink buds opening white; fruit yellow or red.

***Malus Hopa* (Hopa crab)**

A fine upright tree, rose-red flowers and red-fleshed edible fruit.

***Malus niedwetzkyana* (red-veined crab)**

Reddish purple flowers, leaves, fruit and bark.

Malus purpurea aldenhensis

Double wine-red flowers and fruit.

***Malus purpurea eleyi* (Eley's crab)**

Wine-red flowers and fruit.

***Malus Red Silver* (Red Silver Crab)**

Foliage red and silver with dark pink flowers and red fruit.

***Malus scheideckeri* (Scheidecker crab)**

Semi-double pink flowers; very decorative.

***Malus theifera* (Tea crab)**

Soft pink cluster flowers, fruit greenish yellow marked with red.

All above varieties priced as follows:

6/7 ft. tall.....each \$2.50 7/8 ft. tall.....each \$3.00

Larger sized specimens for immediate effect are priced at nursery.

Bechtel's Crab (*malus ioensis plena*)

The showiest of the crab trees; flowers resemble small pink roses in great profusion and attract the admiration of all. Somewhat slower in developing than other crabs.

5/6 ft. high.....each \$3.00 6/7 ft. high.....each \$4.00

SHRUBS

Shrubs form the background for your garden. They give it an air of quiet seclusion and turn it into an intimate outdoor living room carpeted with grass and furnished with bloom.

Beauty Bush

In addition to the varieties most commonly grown there are many others less well known but no more expensive and equally as desirable. Included among these are native types such as the witch-hazels, dogwoods, shadblows and winterberries—shrubs of consistent merit throughout the year.

Aconthopanax pentaphyllum (five leaf aralia)

A graceful shrub with arching branches and glossy foliage. Excellent for city planting.

4/5 ft. high.....	each	\$.60
5/6 ft. high.....	each	.75

BEAUTY BUSH (*Kolkwitzia amabilis*)

Arching branches covered with pink, bell-shaped flowers in June. Six feet high.

4/5 ft. specimen plants	each	.75
5/6 ft. specimen plants	each	1.00

Berberis thunbergi (Japanese barberry)

Needs no introduction. Appreciated for its red berries and colorful foliage in the fall.

12/18 in. high.....	each	\$.30	per doz.....	\$3.00
18/24 in. high.....	each	.40	per doz.....	4.00
24/30 in. high.....	each	.60	per doz.....	6.00

Berberis thunbergi atropurpurea (Red leaved barberry)

A popular variety with bright red leaves.

12/18 in. high, very full branched.....	each	\$.40
18/24 in. high, very full branched.....	each	.60
24/30 in. high, very full branched.....	each	.75

Euonymus alatus (Winged spindle tree)

Curious cork-like bark and irregular branches give the winged spindle tree a decorative value in the winter landscape especially when silhouetted against the snow. Leaves turn crimson in autumn. Good in groups, alone or in a hedge. Trimming almost unnecessary.

2/3 ft. high heavy.....	each \$2.00
3/4 ft. high heavy.....	each 3.00
5/6 ft. high heavy.....	each 6.00
6/7 ft. high heavy.....	each 8.00

Euonymus alatus compacta (Dwarf winged spindle tree)

A lower and more compact form and, like its taller relative, carries yellow flowers and scarlet berries.

2/3 ft. high.....	each \$2.50
-------------------	-------------

Hydrangea arborescens (snowhill)

This bush produces an abundance of foliage and large double white flowers. Thrive in shady places.

HYDRANGEA paniculata (Peegee Hydrangea)

A very hardy shrub with large trusses of snowy white flowers blending into pink and bronze shades in autumn.

Hydrangeas are priced as follows:

18/24 in. high	each \$.40
2/3 ft. high	each .50
3/4 ft. high	each .60

JAPANESE QUINCE (Cydonia japonica)

Brick-red flowers in early spring. Irregular and picturesque branches. Makes a good low hedge or an interesting specimen.

2/3 ft. high.....	each \$.75	3/4 ft. high.....	each \$1.25
-------------------	------------	-------------------	-------------

Kerria Japonica

This is an excellent shrub, never growing too tall. Its slender branches and yellow blossoms make it very attractive. Unfortunately it freezes back in this climate.

12/18 in. high.....	each \$.40
18/24 in. high.....	each .50

Rhodotypos kerrioides (jetbead or white kerria)

A much-branched shrub, one of the best for massing where a low growth is desired. Does well in shaded places. White flowers followed by black fruit.

2/3 ft. high.....	each \$.50	3/4 ft. high.....	each \$.60
-------------------	------------	-------------------	------------

Ligustrum amurense (Amur privet)

An erect-branched, half evergreen shrub up to fifteen feet high. The best of the privets for hedges in the Chicago area.

2/3 ft. high.....	each \$.35	per doz.....	\$3.50
3/4 ft. high.....	each .45	per doz.....	4.50

Ligustrum obtusifolium regelianum (Regel's privet)

Lower growing than the ibota privet, this variety is effective when massed with evergreens. Spreading, horizontal branches.

24/30 in. high.....	each \$.75
---------------------	-------------

Honeysuckle Zabeli

Probably the best of the upright growing honeysuckles. Attractive foliage and real deep pink (red) flowers on every cane followed by an abundance of brilliant red berries.

3/4 ft. high.....	each \$.50
4/5 ft. high—specimen.....	each .75
5/6 ft. high—specimen.....	each 1.00

Lonicera tartarica (Tartarian honeysuckle)

Delicate foliage, pink flowers and scarlet fruits. Ten feet high.

3/4 ft. high.....	each \$.50
4/5 ft. high.....	each .75
5/6 ft. high—specimen.....	each 1.00

Mahonia Aquifolium

This bush has shiny holly-like leaves which turn bronze in fall. One of the most attractive broad-leaved evergreen plants. Does well in full sun or in light shade.

12/18 inch plants B/B.....	each \$1.75
----------------------------	-------------

Philadelphus virginalis (mock orange)

The most popular of the hybrid mock-oranges, it produces very large double pure-white fragrant flowers. Blooms freely in spring and intermittently thru the summer.

3/4 ft. high.....	each \$.60
4/5 ft. high.....	each .75

Philadelphus coronarius (Common mock-orange)

In the gardens of colonial America this was known as the "white pipe-tree," and widely planted; the common mock-orange reaches a height of ten feet or more. Makes a splendid screen.

3/4 ft. high.....	each \$.50
4/5 ft. high.....	each .60
5/6 ft. high.....	each .75

Philadelphus Virginal

Prunus cistena (Dwarf purple-leaf plum)

Valuable to any landscape planting; desirable well-branched plant; fine for foliage color contrast.

5/6 ft. high.....each \$1.50

Prunus glandulosa sinensis (Double flowering almond)

Long a popular shrub. Branches covered with double pink blossoms before the leaves appear. Grows to five feet. Try with mertensias.

2/3 ft. high.....each \$.60 3/4 ft. high.....each \$.75

Prunus triloba flore-plena (Double flowering plum)

Double pink flowers crowd the stems before the leaf buds unfold. A gem for planting against a background of arborvitae and above a colony of grape hyacinths.

2/3 ft. high.....each \$.60 3/4 ft. high.....each \$.75

Ribes alpinum (mt. currant)

This is a very hardy and desirable dense-growing shrub suitable for hedge or as specimen plant. Small greenish flowers in April-May; scarlet fruit; definitely tolerates shade.

Rose of Sharon (althea)

A shrub of great merit though somewhat delicate in our climate. Produces an abundance of flowers in fall and until frost when other shrubs are long through blooming. Flowers are in white, pink, red and purple.

3/4 ft. tall.....each \$.75

Spiraea bumalda Anthony Waterer (Waterer's spirea)

A dwarf shrub popularly used as an edging or in the front of shrub borders. Bright crimson flowers in late June or July.

15/18 inches high.....each \$.45

Spiraea bumalda froebeli

Taller growing than Anthony Waterer. Pink flowers.

2 1/2/3 ft. high.....each \$.50
3/3 1/2 ft. high.....each .60

There are other varieties of trees, shrubs, and vines not listed in this catalog. However, **IF IT IS HARDY**, we grow it.

SPIREA VAN HOUTTEI (Bridalwreath)

One of the most graceful and best-known shrubs, the abundance of white flowers in early spring makes it a much sought after bush for general planting.

2/3 ft. high.....	each \$.35
3/4 ft. high.....	each	.45

Symphoricarpos chenaulti

Fine light green leaves and pink fruits. The best of the group and a shrub to be widely planted.

2/3 ft. high.....	each \$.45	doz.....	\$4.50
-------------------	---------	-----	----------	--------

Symphoricarpos racemosus (Common snowberry)

Waxy white berries that remain through the winter.

3/4 ft. high.....	each \$.35	doz.....	\$3.50
-------------------	---------	-----	----------	--------

Syringa vulgaris (Common lilac)

A sturdy shrub and an old favorite. In two varieties:—one with purple and the other with white blossoms.

2/3 ft. high.....	each \$.50
3/4 ft. high.....	each	.75

Syringa chinenses (Chinese or Persian Lilac)

An upright, vigorous grower, the most free-flowering of all lilacs. Deep reddish-purple flowers in very large heads. One of the best for general planting.

3/4 ft. high.....	each \$.50
4/5 ft. high.....	each	.75

French lilacs

Most desirable, owing to their fine flowers in many beautiful colors.

2/3 ft. high	each \$.75
3/4 ft. high	each	1.00

Syringa Villosa (Late Lilac)

A very pretty lavender-pink bloom in late June. Bright green heavy foliage, very attractive.

3/4 ft. high.....	each \$.50
4/5 ft. high.....	each	.75

Nursery stock personally selected will be tagged and priced at time selection is made.

Viburnum americanum (American cranberry bush)

The common name for this shrub is a complete misnomer since it bears no cranberries. A tall, handsome bush. Scarlet fruits in large clusters form in July and persist through most of the winter.

Viburnum carlesi (Fragrant viburnum)

A low-growing shrub for an intimate spot in your garden. Pinkish, clove-scented blooms in late April and May. Conceded to be an aristocrat.

Dug with ball of earth:

18/24 inches high B/B.....	each	\$2.50
24/30 inches high B/B.....	each	3.00

Viburnum dentatum (Arrow-wood)

Conspicuous white flowers in May and June. Fruits blue-black. Autumn coloring purple and red. Tall and tolerates shade. A good shrub for an informal hedge.

Viburnum lantana (Wayfaring tree)

Tall and tree-like. Wide clusters of white flowers in late June and July. Fruits red, changing to black.

Viburnum molle (Kentucky viburnum)

A mid-western native and exceptionally hardy. Medium height. Clusters of white flowers in May and June. Blue-black fruits.

Viburnum opulus sterile (Snowball)

The common and widely planted snowball develops into a ten-foot shrub. Large round clusters of white flowers in May and June. Give it a sunny location.

Except as noted, all Viburnums are priced as follows:

3/4 ft. high.....	each	\$.75
4/5 ft. high specimens.....	each	1.25
5/6 ft. high specimens.....	each	2.00

Viburnum lentago (Nannyberry)

White flowers in May and June. Fruits blue-black. The tallest of the viburnums reaching a height of twenty-five feet.

3/4 ft. high.....	each	\$.75	4/5 ft. high.....	each	\$1.25
-------------------	------	--------	-------------------	------	--------

The prices published in this list cancel those in all previous lists and is subject to change without notice.

Viburnum opulus nanum (Dwarf cranberrybush)

Very desirable for edging or facing shrubs. Grows very compact and not over 2 ft. Comparatively new in our locality.

18/24 incheseach \$1.50

WEIGELIA FLORIDA ROSEA

Profuse bloomer. Rose-colored flowers in June. An attractive eight foot shrub for the border.

2/3 ft. high.....each \$.50

WEIGELIA BRISTOL RUBY (patented)

Brilliant red flowers cover this new and attractive shrub.

18/24 inches tall.....each \$1.00

WITCH-HAZEL (Hamamelis virginiana)

The common witch-hazel reaches a height of fifteen feet or more. Small yellow flowers and dry, luminous leaves in early winter. Splendid as a background shrub or for use in naturalistic plantings.

3/4 ft. high bushy.....each \$.75

GROUND COVERS and VINES

HONEYSUCKLE (*Lonicera*)

All the honeysuckle vines are adapted for climbing, or for trailing as ground covers.

ENGELMANN CREEPER (*Ampelopsis quinquefolia engelmanni*)

A small leaved creeper. Hardy and clinging.

5 yr. plants.....each \$.75

EUONYMUS *radicans* *vegetus* (Evergreen Bittersweet)

A very desirable plant to use on walls and spread along embankments; also ideal for foundation planting. Produces bright scarlet berries.

5 yr. plants.....each \$1.25 6 yr. plants.....each \$1.50

Lonicera japonica halliana (Hall's japanese honeysuckle)

The widely planted half-evergreen honeysuckle. White, fragrant blooms.

3 yr. plants.....each \$.50

Lonicera sempervirens (Trumpet honeysuckle)

Evergreen during a good part of the year. Flowers in clusters. Red or orange outside, yellow inside.

3 yr. plants.....each \$.60

Celastrus scandens (American bittersweet)

Better adapted as a ground cover than a climbing plant. Effective tumbling over a retaining wall. Prefers poor, somewhat sandy soil. Fruit yellow and crimson.

2 yr. plants.....each \$.40

BOSTON IVY (Ampelopsis tricuspidata veitchi)

Small-leaved type. A vigorous grower and rapid climber. Fine fall coloring.

3 yr. plantseach \$.50

CLEMATIS

Included under clematis are flowering vines of great beauty and wide popularity.

Clematis jackmani

Large-flowered with showy purple blooms four inches across. July to October flowering.

Clematis henryi Large-flowered, white blooms.

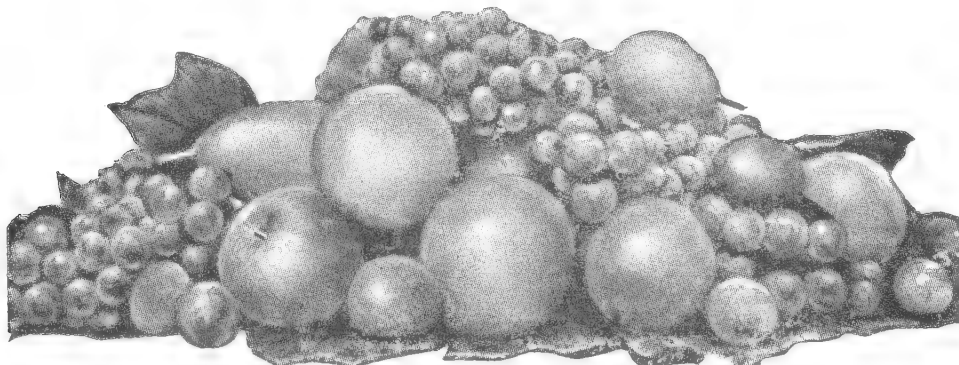

Clematis ramona (popular) Large-flowered, blue blooms.

Grown in 4" potseach .75

Clematis paniculata

Fragrant white flowers in September and October. Long a favorite and one of the best vines for a doorway or for use as a spreading ground cover.

3 yr. plants.....each \$.50

See prices for fruit trees and berry bushes on next page.

FRUITS and BERRIES

In wartime the desirability of the small home orchard and of bush fruits become apparent. Transportation difficulties and rationing fade from the picture when it is possible to pick ripe apples, pears, grapes and blackberries from trees and vines growing in the backyard.

Pruning and Spraying

IN ORDER to maintain a fine, healthy garden, it is imperative that proper attention be given to pruning of evergreens, trees and shrubs. This requirement cannot be stressed too strongly since our own experience demonstrates this point.

Evergreens that are properly and consistently trimmed in spring to overcome lack of fullness in some part of the plant or shapelessness due to uneven growth can, without fear, again be pruned into a better, more perfectly shaped plant.

Although this sometimes takes several years, it is worth your effort and we know you will enjoy the work and results obtained.

While with trees and shrubs, the same procedure should be followed, it does not always have to be done every season as the development is somewhat different from evergreens. Sucker wood and unnecessary branches should be trimmed out whenever they appear. This again gives you better developed plants.

WITH SPRAYING, too much cannot be said about the importance of this obligation to your garden.

Many obstacles are encountered during the year, such as weather and humidity which enable insects and fungi to increase rapidly and alarm everyone without actually alleviating the source of the trouble.

Believing as we do that you may lack knowledge of the proper methods to employ in overcoming these hazards, we again want to give you our suggestions covering the best possible results to be obtained by a simple method of applying preventives when the trouble is rampant.

For a successful and healthy garden, spraying should be attended to early in spring and again in summer if the demand is apparent.

We have the necessary spray material for your needs and recommend items that will give you best results with a minimum of expense and labor.

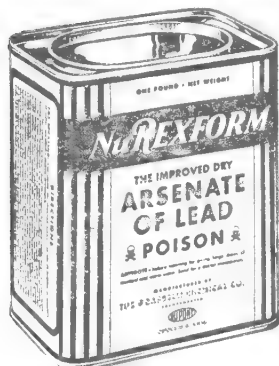

WE URGE YOU to give this matter your earnest consideration. Your reward for the efforts applied will be greater satisfaction and a more abundant garden.

BLACK LEAF 40 A Nicotine Sulphate solution recommended for use in spraying as per directions for soft bodied insects.
